

The Generation Of Layer 1+ Blockchain

Key Factors

- 24+ MONTHS OF DEVELOPMENT
- THE FIRST AND ONLY LAYER 1+ BLOCKCHAIN MVP & MAINNET READY
- UNIVERSAL SOLUTION
- AUDITED & PENTESTED

Vision

BusyXChain's vision is to **allow companies to implement blockchain technology** by eliminating the associated **risks and complexities** of current blockchain solutions. That way, BusyXChain can help **blockchain reach mainstream adoption**.

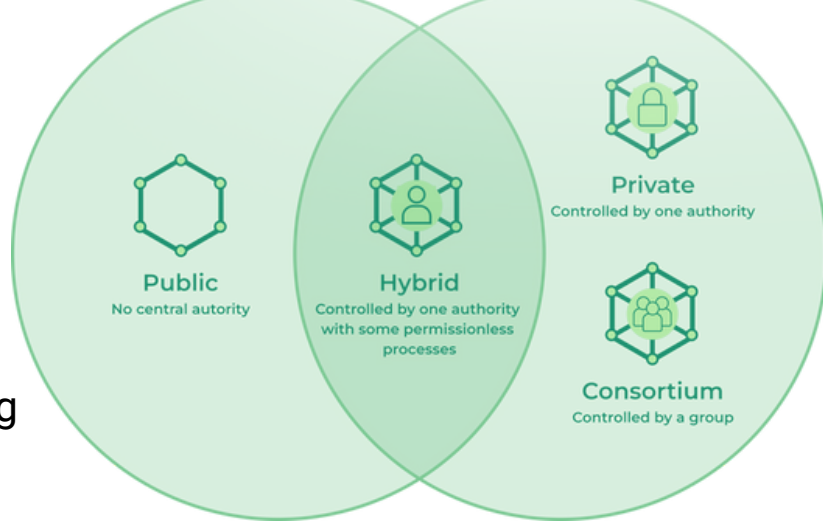

With BusyXChain, **projects, companies and individuals can build their Layer 1** and **take advantage** of a **seamless** and **safest interconnection** between them by eliminating bridges or any intermediaries!

Now even small coffee houses can have **their own token for supporting the businesses** or customer benefits. Large multinational corporations **can build Layer 1 infrastructure** to migrate into a blockchain environment.

From small entrepreneurs to large corporations, that is a way to start. That is BusyXChain, a **Layer 1+ blockchain, platform and builder!**

Problem?

- 1 Absence of a public blockchain platform that allows building Layer 1 blockchains with custom rules and parameters and without restrictions while maintaining full blockchain functionality.
- 1 Cross-chain bridges and interconnects are being exploited for their security vulnerabilities.
- 1 Public smart contracts carry a data exposure risk.
- 1 Difficult business tokenization.

Solution

Quickly & Easily create and deploy your own project or infrastructure. BusyXChain addresses the problem with a virtual layer over our Layer 1 network, allowing for highly secure and seamless interconnectivity.

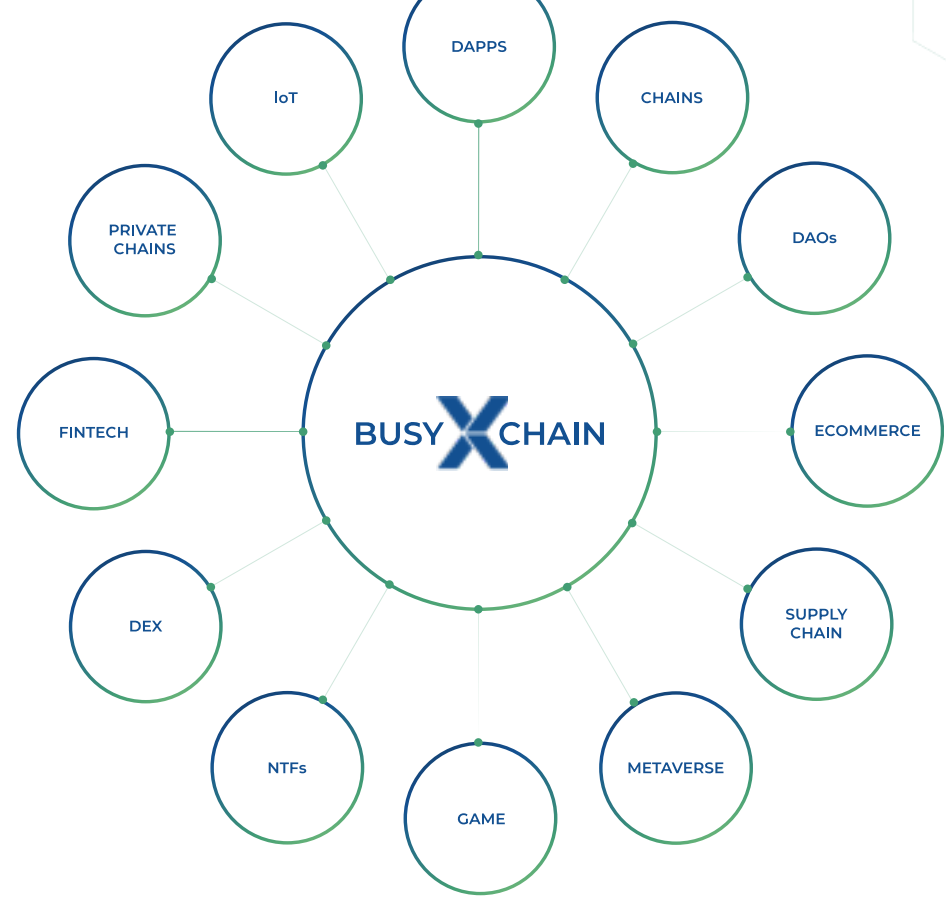

The network allows organizations to build or move their existing infrastructure into a blockchain environment and connect with other projects within our ecosystem, all within Layer 1+.

Set your own rules, and build a public, private, hybrid, consortium or custom Layer 1 solution.

Use case & customers

Open for **All**

- Public, Private, Enterprise
- Various projects across multiple industries
- With or without a token
- Interconnectivity between two or more chains, companies, projects, Apps, DApps, etc.

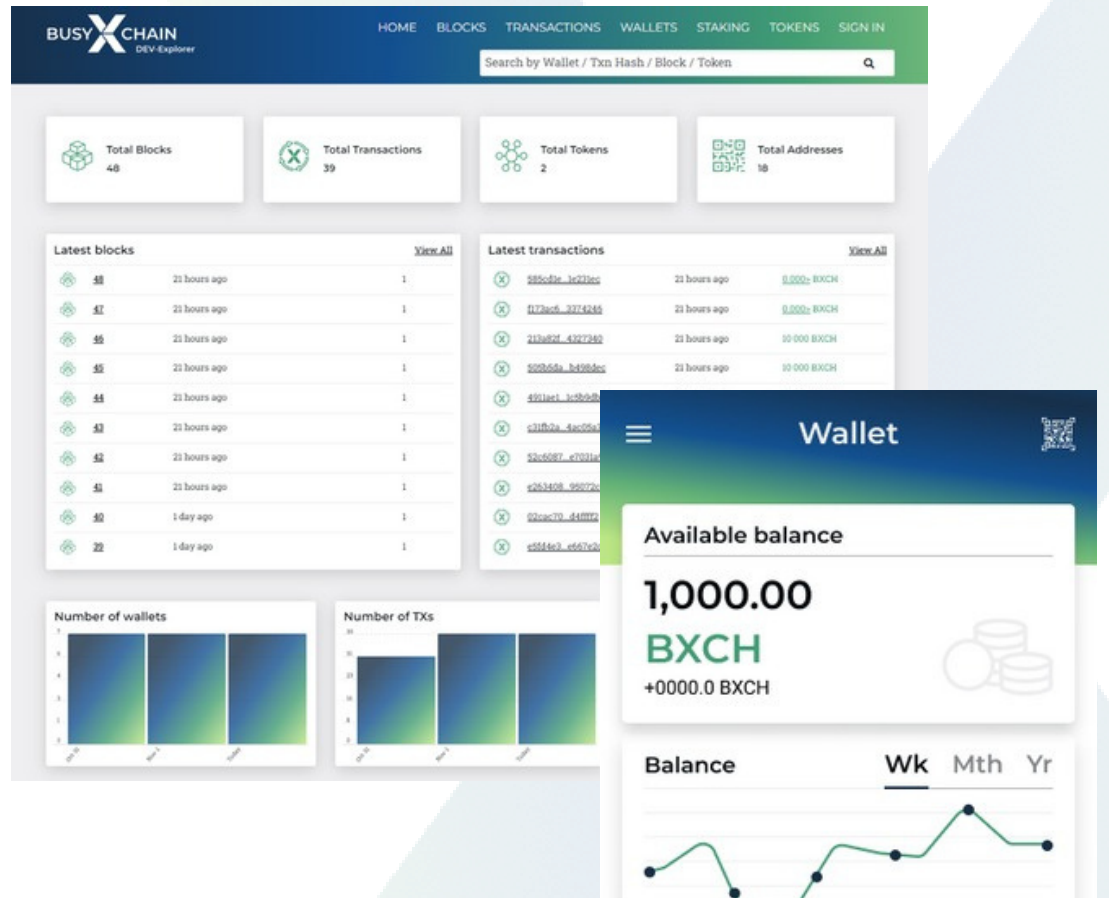

BusyXChain caters for EVERYBODY – companies, governmental organizations, DAOs, startups and entrepreneurs.

Products

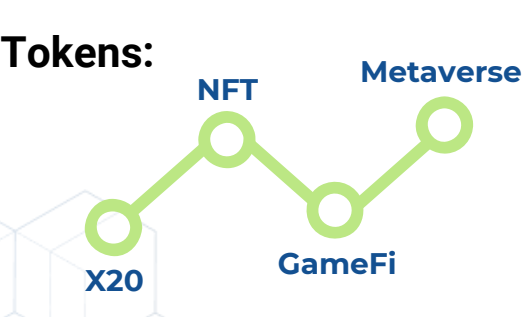

MVP & Mainnet **READY**

- ✓ Blockchain ready and audited
- ✓ Explorer ready for data
- ✓ Desktop Wallet ready
- ⚙️ MobileApp in prototype

Tokenized everything

Ready-to-use **TOKEN CREATOR** directly in the Desktop Wallet.

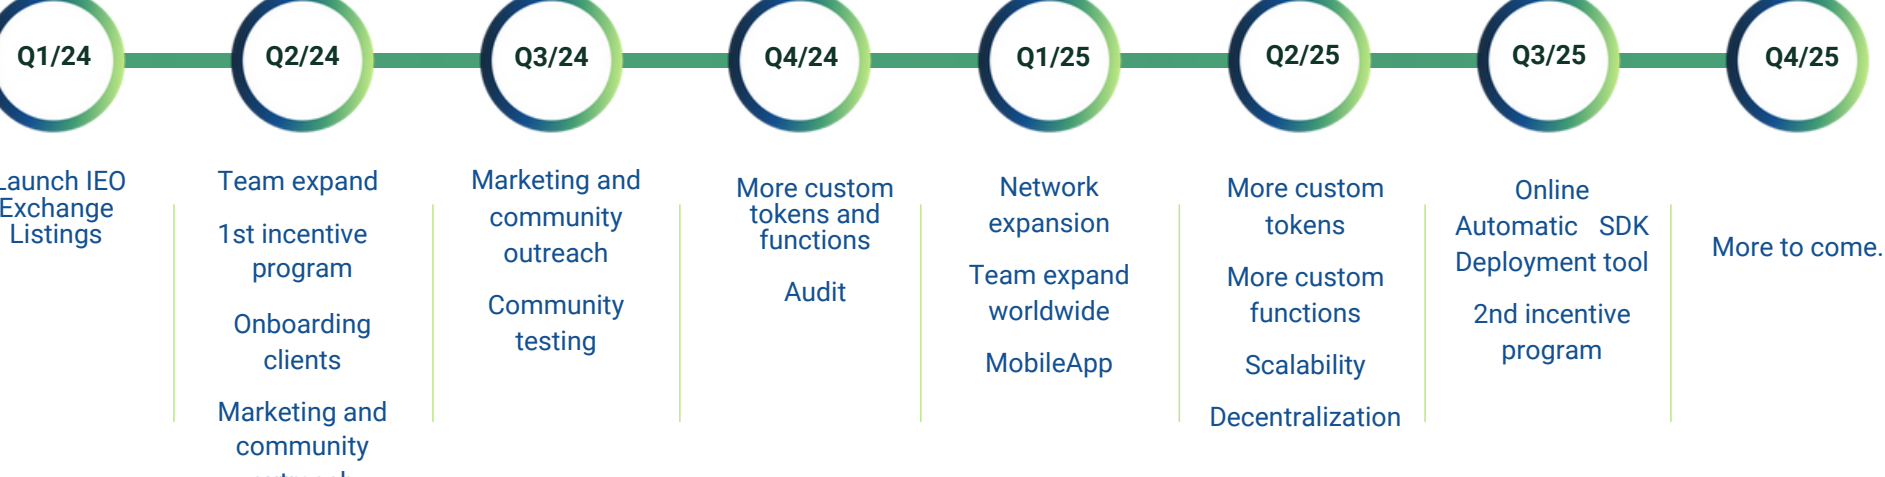

Token types are standardized according to eth standards (ERC20, ERC-1155)

BusyXChain vs competition
